THOMAS EAPEN · SELECTED PRESENTATION SLIDES

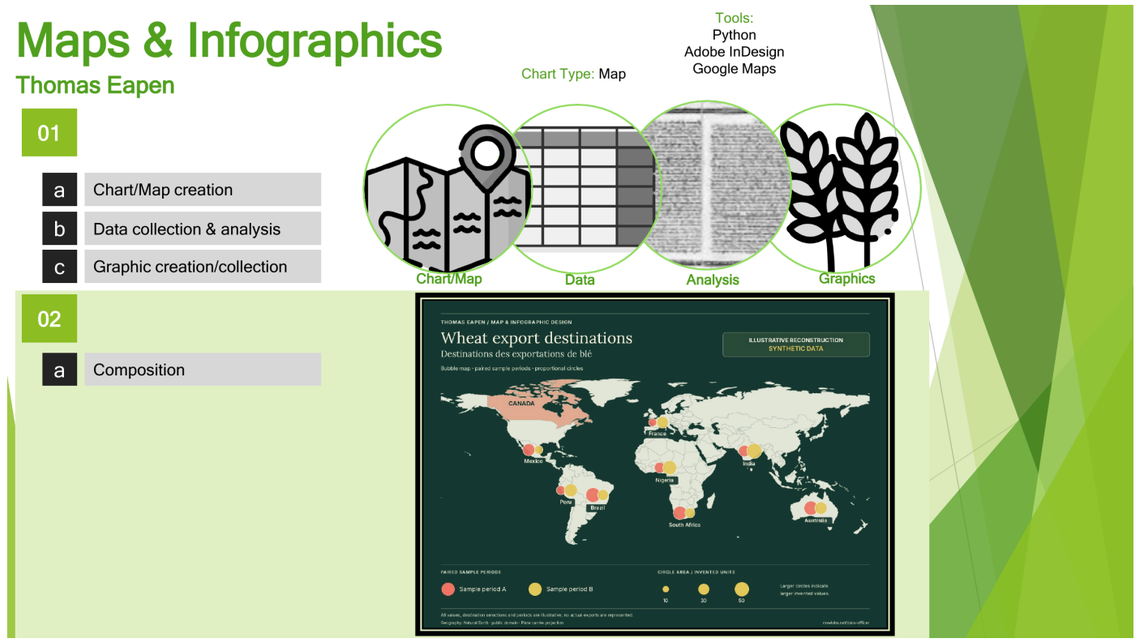

Makeover Exercise — Show and Tell

I presented how I built the Wheat Export Destinations graphic, from geospatial work and analysis to composition and design references.

Monthly Makeover · Maps & Infographics

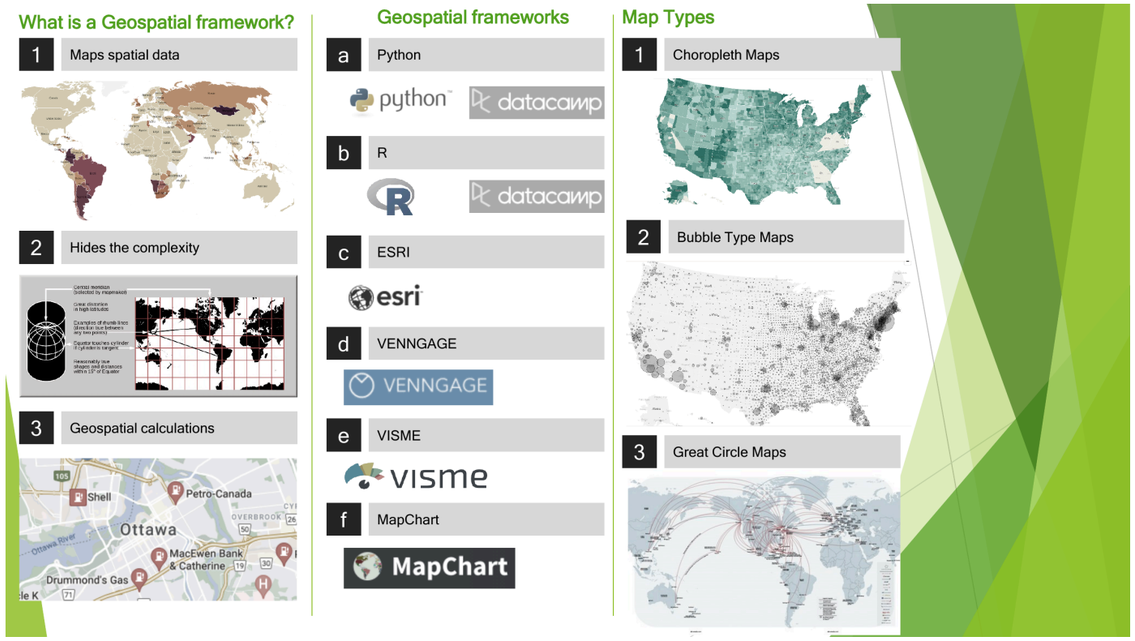

3 selected slides · one-page overview
Slide order follows the original presentation

01 Build the graphic in layers

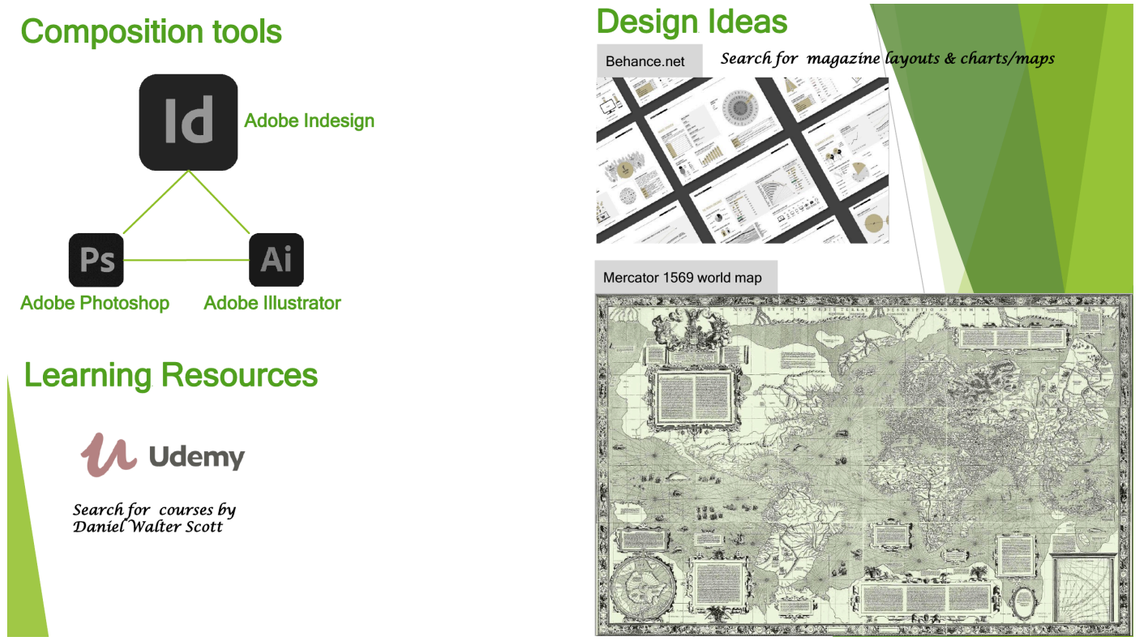

Mapping, analysis and composition come together; the displayed wheat map uses synthetic data.

02 Choose the mapping technique

Choropleth, bubble and great-circle maps serve different communication needs.

03 Compose and keep learning

Use design tools and references to turn analytical material into a readable graphic.
